(54) Title: TELECOMMUNICATIONS CONNECTION APPARATUS

(57) Abstract: A wall plug suitable for connecting
an item of telecommunications equipment to
a telecommunications network, wherein the
equipment and the network are separated by a wall,
the wall including a bore communicating through
the wall, the device comprising a hollow body in
the form of a tube engageable in the bore, the tube
including termination means to terminate a cable
connected to the telecommunications network;
and connection means to receive a connector
of the item of telecommunications equipment,
the termination and connection means being
so arranged that with a cable terminated on the
termination means, connection of the connector to
the connection means provides an interconnection
between the equipment and the network.
